This documentary, together with discussion guidelines, will help you and your Alliance members to talk about the deeply emotional responses sparked by the influx of **refugees and migrants in Europe**.

The short documentary film **The Peace Between**, provides three examples of Europeans who befriended a foreigner. Together, they reflect on their initial emotions and their relationship. We hope that their stories, together with discussion guidelines, will help Christians all over Europe to have a conversation about what they think and feel about strangers arriving in their country, their city, and their street.
